Arizona: every surgery center and its owner, on the public record

SPECIMEN. The delivered Register carries every name and number this copy masks.

CertaGrid Health, Inc. Register of record as of the October 2026 state licensing records and the federal Medicare file for the third quarter of 2026. Public record only. Prepared November 2026; reconciled 15 November 2026.

What this Register is

Every outpatient surgery center licensed in Arizona, grouped by the owner the public record names, with hospital systems and national surgery-center operators set aside and listed by name at the back, and an A-to-Z index of every licensed center at the end. What remains is the independent market, and each owner in it is labelled: a practice platform (a company that owns physician practices and their surgery centers with them) or a physician-owned or other local owner. For each center the state license number, the licensee of record, the Medicare certification date, operating rooms and the surgical specialties the federal file records, and beside each row the record that ties the center to its owner. The first section is the quarter's movement: licenses issued, licenses reissued at an existing center, licensees renamed, licenses gone.

Arizona, October 2026	Centers	Medicare-certified
Licensed outpatient surgery centers	288	220
Hospital-based units (set aside)	9	1
Owned or partnered by a health system (set aside; listed by owner at the back)	76	72
Owned by a national operator (set aside; listed by owner at the back)	19	19
Independent centers	**184**	**128**
of which, owners of two or more centers	81 centers, 21 owners	58
of which, single centers	103	70
of the 184: owned by a practice platform (13 platforms)	39	34
of the 184: physician-owned or other local owner	145	94

Movement, January to October 2026

Between January and October 2026 the state issued 19 licenses: 12 at new centers and 7 reissued at centers already licensed. 2 January licenses left the directory while another license at the same center continued. 1 licensee was renamed on an existing license. 6 licenses left the directory with no license remaining at the address.

Licenses issued at new centers (12)

Owners of two or more centers (21 owners, 81 centers)

Ordered by number of centers. The basis column names the record that puts the center under the owner. Owned against partnered is not read here.

An eye-care group (seventeen centers, ten counties)

17 centers, 17 Medicare-certified; practice platform, named in the delivered Register. Grouped on: license name, published ownership record, or licensing record.

License	Licensee of record	County	Certified since	Rooms	Specialties (federal file)	Basis
OSC[redacted]	S[redacted]	Pinal	02/20/1986	3 OR	eye, plastic	license name

	Total, 17 centers			**39 OR**		

A cardiovascular practice (three centers, one county)

3 centers, 3 Medicare-certified; physician-owned or other local owner. Grouped on: state corporate record.

License	Licensee of record	County	Certified since	Rooms	Specialties (federal file)	Basis
OSC[redacted]	P[redacted]	Maricopa	06/03/2021	2 OR	other	state corporate record
OSC[redacted]	I[redacted]	Maricopa	08/23/2024			state corporate record
OSC[redacted]	P[redacted]	Maricopa	06/17/2024	2 OR	other	state corporate record
	Total, 3 centers			**4 OR**		

19 further owners of two or more centers follow in the delivered Register, each with its table and its label: four held by practice platforms, each platform named, and fifteen physician-owned or other local owners.

Set aside: hospital systems and national surgery-center operators, by owner

Seven hospital systems hold 76 of the 288 licensed centers and eight national surgery-center operators hold 19. The delivered Register lists every one of those 95 centers by name under its owner, with a tally for each owner and a total for each kind, and names the nine surgery units run as departments of a hospital. Nothing licensed in the state is left off the page.

In the federal file, not in the state's directory (30)

Thirty centers appear in the federal Medicare file under a certification number the state's October directory does not carry. They are outside the 288 licensed centers counted above. Eleven are licensed under another name or number and are already in the Register; nineteen hold no current state license. The delivered Register lists them separately, so that a federal list is not mistaken for the state's own.

A-to-Z index of every licensed center (288)

The delivered Register ends with an index of all 288 licensed centers by name, each with the section in which it appears, so that any center in the state can be found whether it is independent or held by a system or an operator.

Sources and method

State licensing and corporate records, the federal Medicare file, operators' own filings and announcements, and published ownership data confirmed against them. Every row carries the record it rests on. Owned against partnered is not read here.

Refreshed quarterly from the state directory and the federal file; each refresh opens with the quarter's movement. Terms: Arizona, one statewide Register, $4,000. It is sold to one company in each category of business. That exclusivity runs for one year, and it is renewable. The first year includes the quarterly refreshes; renewal is half the fee a year. If you show us a row that the public record contradicts, we correct it within five business days. https://www.certagridhealth.com
