The Surgery Center Register

For the person who approves the purchase

CertaGrid Health, Inc. · 23 November 2026

The Surgery Center Register names every surgery center in a state and who owns it. It shows your sales team which independent centers to call on first, and which centers belong to a hospital system or a national operator.

What a team can do with it in the first week

Florida is the example.

1. **Go straight to the centers that do your kind of surgery.** Among Florida's 285 independent centers, 87 do eye surgery, 69 pain and 63 orthopedics. Each is named under its specialty.
2. **Win several centers through one owner.** Sixteen owners hold 46 of the independent centers. Each owner is listed with every center it holds.
3. **Get to new centers and new owners early.** Twenty-seven independent centers have an owner of record dated 2025 or 2026. Each is named.
4. **Check any account before a call.** An index names all 551 of the state's centers, independent or not, and says who holds each one.

What you receive

One Register for the whole state, and four quarterly updates in the first year, each opening with what changed. The Register rests on the public record, and every row can be traced to it.

Exclusivity

Each state is sold to one company in each category of business, for one year, and it is renewable. Tell us the state and what your company sells, and we confirm within one business day whether it is open in your category.

Price

State	First year	Each later year
Florida	$6,000	$3,000
Texas	$6,000	$3,000
Arizona	$4,000	$2,000

Each price is for one state. Any other state, or list of states, is quoted within one business day, and a price sheet covering every state is sent on request. Half is due on go-ahead and half on delivery. Delivery is within five business days of the first payment.

If it is not useful

For a limited time, on your company's first purchase: if a Register is not useful to you, tell us within 90 days of delivery and we refund what you have paid. The guarantee covers up to three states on that first purchase. On a refund, your right to use the Register and its Data File ends, and the state becomes available again in your category.

To go ahead

Write to founder@certagridhealth.com with the state and what your company sells. Scope and terms come back in one letter. Reply "accepted" and the invoice for the first half follows the same day. No meeting is needed; a call is available if you want one.
